PEARCY BROS.

NURSERY

SALEM, OREGON

U. S. Department of Agriculture

Catalogue of Trees, Shrubs, Roses, Vines and Bulbs

FILBERTS

Barcelona - Round. Self-husking. The leading commercial variety. All filberts must have pollenizers. Barcelona is pollenized by DuChilly, and Daviana, using from 10 to 15% pollenizers.

DuChilly - The leading long type nut. In Oregon used only as a pollenizer for Barcelona planting. In Washington it is considerably planted as a main crop variety. Its pollenizers are Alpha, Gassoway and Daviana. Only partially self-husking.

Brixnut - A fine, new variety that is rapidly coming to the front. Large round nuts, Self-husking. Bears early and heavily. Its pollenizer, Halls Giant is also round and self-husking.

Halls Giant - A self-husking round nut of good size used as a pollenizer for Brixnut.

Daviana - A rather shy bearer of long type nuts. Partially self-husking. Pollenizer for DuChilly and Barcelona.

Alpha - A DuChilly type nut used as a DuChilly pollenizer.

Gassoway - Very small round nut. Pollenizer for DuChilly.

Cowlitz - DuChilly type of nut but larger, self-husking and with thicker shell. A new variety on trial.

TYPES OF FILBERT TREES

Barcelona, DuChilly and Daviana may be had both in tip-layered stock and in transplanted stocks. Either makes a satisfactory orchard. A tip-layer is propagated from the mother tree in the propagation orchard. A transplanted tree is a tip-layer that has been grown a year in the nursery. Brixnut, Halls Giant, Cowlitz, Alpha and Gassoway are all budded trees. They are budded or grafted on seedling roots and cannot be supplied as tip-layers or as transplants. Please note this in ordering as the price of the budded trees is higher than that of the other types. The budded tree has a deeper, better root system and makes a beautiful tree.

SEND FOR LEAFLETS ON FILBERT GROWING

ENGLISH WALNUTS

The Franquette is the only English walnut variety that we offer. It is about the only variety planted in the Northwest at present. It is a thin shelled, long type of nut of high quality. Every home should have a tree or two of walnuts to provide nuts as well as shade. Why do without walnuts when you can produce them so easily and so cheaply?

We can supply black walnut trees. These trees make a beautiful shade tree and produce a high quality of meat but in a very hard shell.

SHADE TREES

European White Birch-Upright trees with white bark.

Cut-leaf Birch - Weeping. Drooping, graceful branches.

Variegated Box Elder - Sometimes called silver maple. Green leaves with silver margin. Slow growing.

Catalpa Speciosa - Rapid growing, large tree with large heart shaped leaves. Showy flowers in July.

Jap Flowering Cherry. Kwanzan - Double, dark pink flowers.

Jap Flowering Cherry - Double light pink flowers.

Jap Weeping Cherry - Dark pink. An umbrella like tree of great beauty.

Bechtolds Flowering Crab-apple - Double delicate pink flowers. Slow growing.

American Elm-Large spreading tree.

Chinese or Siberian Elm - A rapid growing drought resistant tree.

Pink Flowering Dog-wood - A most beautiful slow growing tree. A wonderful display of pink flowers in June.

Laburnum or Golden Chain - Has long clusters yellow flowers. May be trained as tree or as large bush.

Hawthorne, Paul's Scarlet - Clusters of double scarlet flowers. Colored fruit in fall. Medium size tree.

Linden - A fine parking tree.

Mt. Ash - A medium size tree with a fall display of red or yellowish berries.

Flowering Peach - Double pink flower very early.

Blieriana Flowering Plum - Dense display of very early double dark pink flowers. One of most showy of flowering trees. Bronze colored foliage.

Prunus Vesuvius - Small tree with purple leaves.

Prunus Nigra - Purple leaved plum with the darkest leaves of any of the purple leaved plums.

Lombardy Poplar - Narrow upright growing tree. Rapid growing.

Purple Fringe or Smoke Tree - Rhus Cotinus.

Judas Tree - Cercis canadensis. Red bud. Has rosy pink flowers before leaves. A good ornamental tree.

Weeping Willow - Makes a great spreading tree very rapidly.

CHESTNUTS

Chestnuts thrive in the Northwest. Head them fairly low and shade the trunk on the southwest side for several years. Plant two or more varieties for pollenization.

Varieties: Progress, Large American Sweet, Fuller, Collosal, and Rochester.

We can supply seeding chestnuts at a lower price than the grafted trees.

BUSH ROSES

Two year bushes that will bloom first year.

Angele Pernet—Reddish-orange shaded chrome yellow.

Autumn—New, richly colored burnt orange, streaked red.

Betty Uprichard—Fragrant, salmon-pink, reverse coppery carmine.

Constance—Yellow with outside buds orange streaked with red.

Cuba—Fragrant. Cardinal red tinted with yellow.

Cecile Brunner—"Sweet-heart rose." Clear pink. Tiny buds.

Cecil—Beautiful single butter-cup yellow.

E. G. Hill—Large scarlet. A fine red.

Etiole de Hollande—Bright red. Fragrant.

Frau Karl Druski—White.

General McArthur—Fragrant. Bright scarlet.

Golden Dawn—Sunflower yellow.

Golden Emblem—Rich yellow. Large buds.

Gloria Mundi—Orange-scarlet baby rose.

Golden Salmon—Polyantha. Clusters of salmon-orange flowers.

Hoosier Beauty—Glowing crimson.

Imperial Potentate—Large rose pink. Excellent.

Irish Fireflame—Large, single, deep orange to old gold.

Isobel—Light rose-pink, apricot shadings. Single.

Joanna Hill—Indian yellow.

K. of K.—Semi-double. Dazzling scarlet.

Lady Hillingdon—Apricot yellow. Fine buds.

Laurent Carle—Velvety carmine. Large. Fragrant.

Li Bures—Brilliant rose-red and yellow mixed.

Los Angeles—Coral pink.

Lulu—Beautiful buds of coral rose.

Margaret McGreedy—Orange-scarlet.

Mrs. Pierre S. Dupont—Among the best new yellow roses.

Mrs. G. A. Van Rossem—Yellow with orange-brown veins.

Mme Butterfly—Flesh pink.

Mme Caroline Testout—Pink. The "Portland" rose.

Mme Eduoard Herriott—Coral red.

Nuntius Pacelli—Finest new white rose.

Padre—Coppery scarlet. A good one.

Pres. Hoover—Medium orange, center red shades. Good.

Sunstar—Yellow, shaded crimson.

Talisman—Rich golden red and copper.

CLIMBING ROSES

American Pillar—Single bright pink flowers with white eye.

Climbing Eduoard Herriott—Coral red with yellow base. Everbloomer.

Climbing Golden Emblem—Rich yellow-streaked with carmine on outer petals. Everbloomer.

Climbing American Beauty—Crimson.

Kitty Kinnenmonth—Very large deep pink. Golden stamens. New.

Mermaid—Immense single flowers of pale sulphur yellow. New. Fragrant. Vigorous.

Pauls Scarlet Climber—Best selling scarlet climber.

Scorcher—New. Large, brilliant scarlet crimson. Semi-single.

Silver Moon—Semi-single white with yellow stamens.

Dr. Van Fleet—Flesh pink. Double.

Dorothy Perkins—Shell pink in clusters.

Climbing Lady Hillingdon—Apricot-yellow.

Climbing Cecil Brunner—Tiny buds, clear pink.

Climbing Mme Caroline Testout—Pink.

Climbing Talisman—Golden red and copper.

SMALL FRUITS

Every home should have a well diversified planting of berries of various kinds. They come into bearing quickly and help very materially in keeping the table supplied.

Yeungberries—A cross between logan berry and dewberry. Very large, dark colored berries, excellent for eating fresh as well as for canning. Not acid like the loganberry.

✓ Ideal Wild Blackberry—A selection of the native wild blackberry that produces well under cultivation. If you like our common wild blackberry (not the evergreen blackberry) you will like this one.

RASPBERRIES

Lloyd George—A new, large, high quality raspberry, earlier than Cuthbert and produces a fall crop as well as spring crop.

Chief—New, a very promising, hardy, early berry.

Latham—A heavy producer but considered by many a little low in quality.

St. Regis or Ranere—Produces both spring and fall crops.

Cuthbert—The old standard red raspberry. Good quality but not heavy bearer.

Black-caps or Black raspberries—Munger is a good canning berry and the leading commercial variety. Cumberland is a fine home variety.

Loganberry—For canning, juice and jam. Should be in every garden.

Gooseberry. Oregon Champion is the great canning berry of the West.

Perfection Currants. The best of the red varieties.

Strawberries. — Gold Dollar, New Oregon, Marshall, Magoon, Etterberg 121. Corvallis 12. are all standard varieties. Gold Dollar is early and Etterberg late, and the other varieties ripen in between. Progressive Everbearing for fall crops.

Riverside Giant Rhubarb. Makes a large stalk of high quality when well fertilized.

Mary Washington — the rust resistant asparagus.

GRAPES

Every home should have its own grapes. They are very easily grown, do best in warm, rich, deep soil. Plant 8 ft. apart.

Campbells Early—The leading blueblack variety of the N. W. Large berries and ripen early, good quality.

Worden—Blue black, larger than Concord a few days earlier.

Concord—Blue black, long a standard variety.

Niagara—One of best white varieties.

Iona—Red, like Delaware but better.

Agawam—Dark red large berries, productive, ripens with Concord. A high grade variety.

Persimmon

The Oriental persimmons are becoming popular with those who have tried them. They ripen regularly here, producing good sized red or orange fruits. Very ornamental.

Varieties; Fuyu and Hachiya:

APRICOTS

Southwick—A local variety that seems to be best of all in Willamette Valley.
Wenatchee Moorpark—One of most popular varieties
Tilton—Large, high quality

ALMONDS

While Almonds are not commercial here still they are worthy of planting in home orchards as the local varieties that we offer, bear good crops quite regularly.

We offer Craven and Smart—Two local varieties that have proved worthy

Nectarine

Boston—Similar to a peach but with no fuzz on the skin, sweet

QUINCE

Pineapple

Orange

PLUMS

Peach—Early, red skin, yellow meat

Shiro—Early, yellow skin

Satsuma—Red flesh and red skin good quality.

Santa Rosa—A fine large, purplish crimson fruit. One of best.

Blue Damson—Small blue fruit, an improved strain larger than most Damson strains.

Silver—A popular yellow fleshed variety

Hungarian—One of largest, reddish purple

PRUNES

Italian—Leading canning variety

Petite—Sweet, small fruits

Noble Petite—A wonderfully improved Petite, of recent introduction, fine quality, every orchard should have one

Date—A petite type that is larger than true petite

CHERRY

All our cherries are on Mazzard roots which have proven best

SWEET VARIETIES

Royal Anne—The great canning sweet cherry, pollenized by Black

Republican, Waterhouse, Hoskins, yellow with red cheek

Bing—Large black variety ripening closely after above

Lambert—Fine for home canning as well as fresh use, in our mind the best cherry grown reddish black

Black Republican—Ours is the O. S. C. strain used as pollenizer for all three above varieties.

Waterhouse—Similar in appearance to Royal Anne but softer

Pollenizer for other sweet varieties

Hoskins—Black, fine pollenizer.

SOUR CHERRIES

Early Richmond—(Kentish), good canner, early

Montmorency—Leading Sour cherry a little later than above

Fine quality, pollenized by Ey. Richmond for commercial plantings. Use eight Montmorency to 1 Ey Richmond

Late Duke—A half sour variety, Large Dark red

May Duke—Very early half-sour

English Morello—Acid, blackish red.

FIGS

Latturula Honey is the best fig for N. W. conditions, two crops annually, no seeds.

APPLES

Listed in approximate order of ripening.

Yellow Transparent - Ripens in July.

Good cooking.

Charmaloff. - Yellow.

Red Astrachan. - Stripped red. Early.

Gravenstein. - Late August. Fine apple.

Red Gravenstein. - Like above but red.

Hardy. Fine apple for western Washington and Oregon.

King. - Large fall apple. Nov. and Dec.

Jonathan. - Bears young.

Winter Banana. - Yellow.

Ortley (White Bellflower) - Yellow. Good keeper. High quality.

Delicious—Greenish red. Fine quality. December and January.

Red Delicious—Deeper red than above.

Yellow Delicious—High quality. Good keeper.

Spitzenberg—Stripped red. High quality Hard to grow.

Northern Spy—Greenish red Good keeper. Slow to bear.

Red Spy—A new red skinned Spy.

Baldwin—Good keeper, subject to corky spots in flesh

Rome Beauty—Fine keeper, good baker, bears regularly

Yellow Newtown—A fine keeping yellow apple

Red Rome—Like Rome Beauty, but solid red,

Stayman Winesap — Dark red, good keeper,

Hyslop crab apple, a large red crab

Whitney crab apple, a large productive variety

PEARS

Bartlett—Best canning variety, August-September

Bosc—Fine desert pear, Sept

Clargeau—Large, fair quality, early winter

Comice—High quality, Oct.-Nov

Anjou—High quality, Oct. Nov

Winter Nelis—Small, delicious fruit, Dec. Jan

Seckel—Small, Yellowish brown with Red cheek, finest quality.

PEACHES

Mayflower—Earliest, white flesh

Hales Early—Early, white flesh

Triumph—Yellow flesh, Bears early and regularly.

Columbia—Best of white flesh peaches
Rochester—Most promising peach for home orchards, very hardy

Crawford type but a little earlier and bears better, yellow flesh. If you plant but one peach use this one—Free Stone

Early Crawford—Standard home canner, yellow flesh, free stone

Charlotte—Similar to Ey. Crawford

Muir—Yellow meat, good canner but only fair for fresh use

Improved Elberta—One of the best for commercial use

Fine Canner yellow flesh, Freestone

J. H. Hale—Good canner and shipper Yellow flesh, large size.

Late Crawford—Fine quality, yellow free stone.

Tuscan Cling—Yellow cling stone.

DECIDUOUS SHRUBS

This list are shrubs that lose their leaves in winter. Most of them are very hardy, fairly rapid growing and get along with much less watering than is required by Evergreen shrubs. Figures indicate approximate height bush grows to.

- Pink Flowering Almond - Double pink flowers in April. 4 ft.
Althea Boule de Feu - Red. 10 ft.
Red Leaved Barberry - Bronzy red leaves. Plant in sun. 4 ft.
Jap Barberry - Red berries in fall. Leaves color up in fall. 4 ft.
Beauty Bush (Kolkwitzia) - A new hardy shrub with abelia-like flowers.
Butterfly Bush (Buddleia) - Rapidly growing bush with lilac-like flowers. 10 ft.
Pink Deutzia - Double flowers fringed with pink. 8 ft.
Forsythia Spectabilis - Golden Bells. Yellow flowers very early in spring before leaves appear. 10 ft.
Hydrangea P. G. - Large plume shaped flowers in fall. 6 ft.
Lilac - Common purple lilac. 8 ft.
Budded Lilacs.
Pres Grevy - Double blue.
Chas. X - Single-purplish red.
Ludwig Spaeth - Single. Dark lilac-red.
Leon Gambetta - Double pink. Large.
Mrs. Abel Chatenay - Double white.
Double Mock Orange, Philadelphus Virginale - Double, pure white scented flowers.
Jap Flowering Quince - Pink flowers. Early. 6 ft.
Common Snowball - White flowers in balls. 8 ft.
Spirea Anthony Waterer - Rose colored summer blooming variety. 4 ft.
Spirea Prunifolia (true bridal wreath) Small double white flowers, making long, white garlands.
Spirea Thunbergi (Jap Spirea) - First to bloom in spring. Smaller than above with dropping branches.
Spirea Van Houtte - Best known of the Spireas. White flowers.
We have other shrubs not listed here.

BULBS

The bulbs in this list are for fall and early winter sale only.

TULIPS

- Psyche - A Darwin. Rich, rosy pink.
Clara Butt - Darwin. Apple blossom pink.
Sultan - Glossy, maroon black. A Darwin.
Bronze Queen - A Breeder. Soft buff, tinged golden yellow inside.
Eclipse - Yellow, rose tinted. A lily flowering variety.
King Alfred - Narcissus. Deep golden yellow. Best yellow trumpet daffodil.

DUTCH IRIS

- Bulbous Iris. They bloom after the tulips.
Imperator - Very dark blue.
Yellow Queen - Yellow.
Grape Hyacinth - Muscari.
Regal Lily bulbs.
Mt. Hood Lily bulbs.
Tiger Lily bulbs. Single.

VINES

- Boston Ivy - A fine vine for clinging to brick or stone. Loses leaves in winter.
English Ivy - An evergreen ivy with shiny green leaves. Fine for covering steep banks.
Virginia Creeper - A rapid growing vine for covering trellis and pergolas. Leaves color in fall and drop off in winter.
Clematis Henryi - Large creamy white flowers.
Clematis Jackmani - Large violet-purple flowers. Hard to grow.
Clematis Montana - A hardy spring flowering variety.
Clematis Paniculata - Great masses of small white flowers. Hardy and rapid growing.
Belgian honeysuckle - Makes fragrant red and yellow flowers.
Halls Evergreen honeysuckle - Whiteish flowers.
Wisteria Multijuga - Immense clusters of drooping purple flowers.

PEONIES. Plant in fall.

- Albert Crousse - Shell pink flecked with crimson
Couronne d'Or - White with yellow stamens.
Duchess of Orleans - Early, deep pink.
Duke of Wellington - Mid-season. large white, creamy center.
Edulis Superba - Bright clear pink.
Eugene Verdier - Delicate blush shading to hydrangea pink
Felix Crousse - Brilliant red. One of the best.
Festiva Maxima - Large white with crimson markings in center. One of the best.
Floral Treasure - Rose type, large, clear pink.
L'Eclatante - Deep velvety crimson.
Mons Jules Elie - Deep shell pink with silvery reflex. One of the best.

FREE LITERATURE

We will mail free leaflets on "Filbert Growing" and on "Development of a Model Home Planting".

This descriptive list contains no prices. A price list will be sent free upon request.

Our shipping season generally starts early in November. Just as soon as our trees are ripened we start shipping. We do not resort to the practice of digging half-matured trees in order to make exceptionally early shipments. Order early to obtain best selections and earliest shipments.
